for VHF & UHF digital and HD TV channels

Operation Guide

Models RZ-6000 White and RZ-6035 Black

OPERATION

1. Ensure the antenna power supply is in the "ON" position and the green indicator light is illuminated.
2. Rotate the directional handle counter-clockwise until it hits the hard stop (Travel Position). In this position the antenna will be pointing toward the rear of the RV. Follow the instructions from the TV manufacturer to perform a channel scan on the TV. Make certain to scan in Air or Antenna mode.
3. If few or no channels are found, push up on the handle, and rotate the handle 90 degrees counter-clockwise. Perform a second channel scan according to instructions in step 2. Repeat as needed until channels are found.
4. To improve the number of received channels and/or picture quality, fine-tune between and around the two scan points by slowly rotating the handle and performing additional channel scans.
5. When finished using the antenna, place the antenna in Travel Position by rotating the handle counter-clockwise as indicated by the arrow on the ceiling plate. Rotate until the antenna hits the hard stop and will not rotate any further. Turn off the antenna power supply.
