**WARNING:** Please abandon the refrigerator according to local regulators for its use flammable blowing gas and refrigerant.

Do not use extension cords or ungrounded ( two prong ) adapters

**DANGER:** Risk of child entrapment. Before you throw away your old refrigerator :

-Take off the doors  
-Leave the shelves in place so that children may not easily climb inside  
The refrigerator must be disconnected from the source of electrical supply before attempting the installation of accessory

Refrigerant and cyclopentane foaming material used for the refrigerator are flammable.

Therefore, when the refrigerator is scrapped, it shall be kept away from any fire source and be recovered by a special recovering company with corresponding qualification other than be disposed by combustion, so as to prevent damage to the environment or any other harm.

### 1.2 Meaning of safety warning symbols

Prohibition symbols

The symbols indicate prohibited matters, and those behaviors are forbidden. Non-compliance with the instructions may result in product damages or endanger the personal safety of users.

Warning symbols

The symbols indicate matters that must be followed, and those behaviors must be strictly executed in line with the operation requirements. Non-compliance with the instructions may result in product damages or endanger the personal safety of users.

Note symbols

The symbols indicate matters to pay attention to, and these behaviors shall be specially noted. Due precautions are needed or minor or moderate injuries or damages of the product will be caused.

This manual contains lots of important safety information which shall be observed by the users.

### 1.3 Electricity related warnings

- Do not pull the power cord when pulling the power plug of the the commercial refrigerator. Please firmly grasp the plug and pull out it from the socket directly.
- Do not damage the power cord under any condition so as to ensure safety use, do not use when the power cord is damaged or the plug is worn.
- Worn or damaged power cord shall be replaced in manufacture-authorized maintenance stations.

- Please use a dedicated three-hole power socket which is 15A or more and the power socket shall not be shared with other electrical appliances.
- The power plug should be firmly contacted with the socket or else fires might be caused. Please ensure that the grounding electrode of the power socket is equipped with a reliable grounding line.

- Please turn off the valve of the leaking gas and then open the doors and windows in case of leakage of gas and other flammable gases. Do not unplug the commercial refrigerator and other electrical appliances considering that spark may cause a fire.

- To ensure safety, it is not recommended that to place regulators, rice cookers, microwave ovens and other appliances at the top of the the refrigerator, those recommended by the manufacturer are not included. Do not use electrical appliances in the food pantry.

#### 1.4 Related warnings for use

- Do not arbitrarily disassemble or reconstruct the cooler, nor damage the refrigerant circuit; maintenance of the appliance must be conducted by a specialist.
- Damaged power cord must be replaced by the manufacturer, its maintenance department or related professionals in order to avoid danger.

- The surrounding of the appliances around or the embedded structure shall not be obstructed while good ventilation shall be maintained.
- The gaps between refrigerator doors and commercial refrigerator body are small, be noted not to put your wet hands hand in these areas to prevent squeezing the finger. Please be gentle when switching off the refrigerator door to avoid falling articles.

- Do not allow children to enter or climb the refrigerator to prevent that children are sealed in the refrigerator or children are injured by the falling refrigerator.

- Do not place heavy objects on the top of the refrigerator considering that objectives may fall when switching the door, and accidental injuries might be caused.
- Please pull of the plug in case of power failure or cleaning. Do not connect the refrigerator to power supply within five minutes to prevent damages to the compressor due to successive starts.

#### 1.5 Warnings related to placing items

- Do not put flammable, explosive, volatile and highly corrosive items in the refrigerator to prevent damages to the product or fire accidents.
- Do not place flammable items near the refrigerator to avoid fires.

- This product is refrigerator and shall be only suitable for the storage of foods and drinks. According to national standards, refrigerators shall not be used for other purposes, such as storage of blood, drugs or biological products.

#### 1.6 Warnings related to disposal

The refrigerator contains small amount of environmental friendly refrigerant and combins air in insulating layer. The refrigerant and air shall be processed specialized. Do not break refrigerant loop before specialized processing.

## 2 Proper use of refrigerator

### 2.1 Names of components

⚠ The refrigerator you buy some of the features and accessories may be entirely consistent with the legend, please refer to the object.

### 2.2 Temperature Control

After the refrigerator has been turned on, turn the temperature control knob to adjust the level of temperature controller. Setting the control to cold is the warmest setting. Setting the control to colder is the coldest setting. Moving the control to OFF stops cooling.

### 2.3 Move

For short distance and adjust position, the refrigerator can be moved by two wheels in the rear. It is prohibited from long distance and uneven ground pushment.

### 2.4 Placement

Before using the refrigerator, remove all packaging materials including bottom cushions and foam pad sand tapes inside the refrigerator, tear off the protective film on the door and the refrigerator body.

The refrigerator is placed in a well-ventilated indoor place, the ground shall be flat, and sturdy (rotate left or right to adjust the wheel for leveling if unstable).

Keep away from heat and avoid direct sunlight. Do not place the commercial refrigerator in moist or watery places to prevent rust or reduction of insulating effect.

The hot air from side wall of refrigerator shall be exhausted unrestricted, or compressor's power will increase and further increase power consumption. Thus the distance between refrigerator and walls or neighboring furniture shall not less than 4cm.

- Please leave enough space to ensure feasible opening.
- Dimensions shown are for reference only.

### 2.5 Start

The refrigerator shall stay for half an hour before connecting power when it is firstly started.  
The refrigerator shall run 2 to 3 hours before loading drinks; the refrigerator shall run for more than 4 hours in summer in advance considering that the ambient temperature is high.

### 2.6 Energy Conservation

- The refrigerator shall be placed in room dry and ventilated. The refrigerator cannot be put under direct sunlight or next to heat source (Such as radiator, stove, etc.), and a suitable insulation board shall be applied if necessary.
- Try to shorten opening time of refrigerator's door.
- Put foods, beverages into refrigerator after it has cooled down.

### 3 Proper use of refrigerator

3.1 Disconnect the refrigerator  
Unplug power plug to disconnect the refrigerator.

3.2 Stop using the refrigerator

- If the refrigerator left unused for a long time, please:
1. Unplug the refrigerator;
  2. Clean the refrigerator;
  3. Keep the refrigerator door open.

3.3 Clean the refrigerator

Dusts behind the refrigerator and on the ground shall be timely cleaned to improve the cooling effect and energy saving. The interior of the refrigerator should be cleaned regularly to avoid odor. Cleaning procedure is below:

1. Unplug power plug or disconnect cutoff;
2. Clean door seal with only clear water and give thorough wipe;
3. Reconnect and power refrigerator when cleaning is completed.

- Do not use hard brushes, clean steel balls, wire brushes, abrasives, such as toothpastes, organic solvents (such as alcohol, acetone, banana oil, etc.), boiling water, acid or alkaline items clean the refrigerator considering that this may damage the refrigerator surface and interior.
- Do not use water so as not to affect the electrical insulation properties.
- Do not use detergent and solvent with sand or acid. The drain hole shall be cleaned regularly to ensure water can be drained. Clean the drain hole with a thin stick or something similar.

### 4 Trouble shooting

#### Normal noises

Buzzing-The refrigerating units are working.  
Grunt, rumble or gurgle-Refrigerating fluid is flowing in pipeline.

#### Noises that can be removed easily

- Unsteady location of refrigerator:  
Use gradienter to coordinate the refrigerator into smooth level. Can use thread support arm or put cushion under it.
- The refrigerator leans against other furniture:  
Move refrigerator away from furniture or equipment it leans against.
- Containers contact with each other:  
Separate bottles or containers slightly.

#### Small trouble shooting by yourself.

Before calling after-sale service: Please examine to find out whether you can perform trouble shooting by yourself following under prompts.

Fault	Possible Causes	Remedies
Temperature has big deviation with set temperature	Frequently open of commercial refrigerator a door. Too much bottom input	Turn off refrigerator power for 5 minutes can sometimes reset it. If temperature is too high, examine after several to find out whether temperature return to set value. If temperature is too low, recheck the temperature in the next day.
refrigerator not cool down inside	refrigerator power off or black-out; cutoff disconnect; attaching plug loose	Reduce open frequency of commercial refrigerator. Wait for 4-5 hours.
refrigerator not refrigerator		Press switch button, check whether power is on, check cutoff.
