

The WeatherShield Difference

Shop Smarter and Take Advantage of the WeatherShield One Piece Fiberglass Roof

- **Aprox. 42% Thicker material compared to the competition**
- **Thicker material provides a much more puncture resistant roof membrane**
 - **Providing more piece of mind when driving under low hanging branches in travel or at the campsite**
- **Motorized RVs have been using fiber glass roof material for years**
 - **The WeatherShield has introduced the premium fiberglass roof membrane into the travel trailer industry at a more affordable price**
 - **Providing top level value from the day you purchase your camper**
- **The WeatherShield wraps around the corner of the sidewall - eliminating an exposed corner seam between sidewall and roof**
- **The WeatherShield pairs with a Full-Profile front cap - ONCE AGAIN - eliminating an exposed corner seam between sidewall and the front of your coach**
- **WeatherShield is paired with moisture cure sealant around ALL accessories attached/installed on the roof**
 - **Moisture cure sealant does not gas and dry out - prolonging the integrity of the seal**
