## AM/FM OPERATION

*AM antenna offered only in some models.*

Consult your vehicle owner's manual for operation of the radio.

**First time users** must run a channel scan after installing the antenna to receive maximum programming.

Ensure the antenna power supply (wall plate) is in the “ON” position and the green indicator light is illuminated.

A new scan will find any new channels that have been added in your area as well as finding any channels that have changed or moved since the last scan.

While the steps to perform a channel scan may vary between televisions or compatible devices, below are some general guidelines to follow.

## How to Run a Channel Scan

Using the television remote, select “Menu” and then “Settings.”

Select “Channel Setup.”

Select “Antenna” or “Air,” depending on your TV. Make sure you are not on “Cable.”

Select “Channel Search” or “Channel Scan.” Keep in mind that steps to perform a channel scan may vary. If the wording in your TV differs from the options shown, refer to your TV user manual for help.

**Running a channel scan is NOT the same as pressing Channel UP/DOWN on your remote.**

To receive maximum programming, you have to run a channel scan after setting up the antenna. To keep your channel line-up up-to-date, it is a good idea to run a channel scan monthly, anytime a channel is lost, and anytime you change locations.
