

How to keep your solar panel clean:

Although Go Power Solar RV Kits are generally maintenance free, significant performance gains can be made with clean solar panels.

- 1: Clean the solar panels monthly. Use water and a soft sponge or cloth. A mild non-abrasive cleanser can be used for more stubborn residue. Rinse well.
- 2: Clean solar panels more frequently during drier months, as they may become covered in dust more quickly. A pressure washer is not recommended.
- 3: Visual inspection – check the exterior for cracks, missing or broken hardware or other potential problems. Check all roof penetrations and replace sealant areas as required
